## Notes on Report

- **Cost of Funds** is calculated as follows:

$$\frac{InterestExpense}{TotalDeposits} * 100$$

- YTD annualization is applied to Interest Expense.
- YTD annualization uses the YTD Interest Expense and extrapolates that over a 4 quarter period. If you have 1 quarter of interest expense, then this will be multiplied by 4 quarters divided by 1 quarter. If you have 3 quarters of interest expense, you will multiply this by 4 quarters divided by 3 quarters.

- **Efficiency Ratio** is calculated as follows:

$$\frac{NonInterestExpense}{NetInterestIncome + NonInterestIncome} * 100$$
